About the activities

Despite the great reviews we received, most of the students seemed to not be receptive to our activities. That is why we decided to change whenever it didn't go as good as we wanted. In total, we had 9 activities, including 2 for the 6th graders and 2 energizers (developed in the final report).

About the results

As we started with an energizer these last 2 months, we've been asked all the time to play more games like « The Human Knot ». We thus understood that they wanted to have fun instead of doing something more serious as we understood at the beginning of the month. The next challenge will be to combine the demands in order to please everyone, including us.

SOME FEEDBACK

« we really enjoyed
the time we had
with you! »

« we can play more
games »

« you should play
more funny
games »
