BRAND NEW START

First of all, a small presentation is essential.

So: Hello, Bonjour, Buenos dias, Buongiorno, Bom Dia, Buna Ziua. We are Beatriz, Guillaume, Magdalena, Doriane, Irene, Nicolas and Beatriz (again!).

We come from France, Italy, Portugal and Spain.

Why did we leave our distant lands? **For you!**

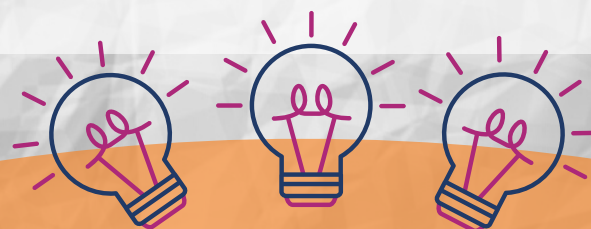

Our project **Digimedia** is part of a process of information and informal education. Together, our goal is to **help the youth of Constanta and to improve their digital skills and to use social networks in a creative way.**

We are here **for you** and it will be a pleasure to work **with you.**

See you soon!

Team Building

We began our project by a 5-day training which involved 6 volunteers, our 2 mentors and our coordinator. We were lucky to spend these days under the supervision of Cornel, who is an incredible trainer. During this training, we chose our team **leader**, **motto** and **logo** for our group.

We also started to discover the **RACI matrix** & **Gantt Chart**, which are project management tools. Therefore, we decided to do a 30 min meeting every week in order to discuss and improve our **method of work**, our **communication** and our **team building**.

Our Activities

Upon arrival, our first mission was to define the **goals** and the target of the project. In order to develop our **visibility** with the youth of Constanta we began by face-lifting the website of the association. Social networks being our primary source of contact with young people, we decided to develop a new **communication strategy**, more suitable to the wishes of our audience. On top of that, we worked about the strength and weakness as a volunteer. Thanks to this analysis we created a SWOT matrix to develop solutions and processes for work. An important part of our volunteering project is to **discover your new environment and the culture of your host country**. With this in mind, we enjoyed the visit of Constanta with Diana, the touristic guide who told us more about the history of our new city. Besides, we had the opportunity to visit the Maritime University of Constanta and be inside of a boat simulator (one little tip, watch out for seasickness because it was really impressive to be there).
