ENTREPRENEURIAL
MINDSET FOR FUTURE
YOUTH WORK

2020-2022

NEW PROJECT LAUNCHED September 2020

FROM IDEA ...

European young people possess huge energy and a great desire to grow up and succeed. From this perspective, we aim to encourage entrepreneurship and unlock the growth potential of youth, in particular of those with fewer opportunities.

The idea was born from the will of four European partners to create an effective model for teaching entrepreneurship, scalable at European level.

- TEAM4Excellence, Romania
- Co-Labory, Italy
- INBIE, Poland
- ISTANBUL VALILIGI, Turkey

... TO SUCCESS

During the next 2 years, the consortium led by the Romanian partner will cooperate to implement project activities and to set an Entrepreneurial Mindset. It is expected to create a motivating context for staff, youth workers and young people.

Youth workers will use new tools and techniques to empower youth to take a step in the world of social entrepreneurship.

The successful implementation of the project will be consolidated during a training course, when participants will test the results of the project. Thus, they will become multipliers of the contents learned on their territory.

WHO WILL BENEFIT

- **Young people** - the workshop participants will improve their soft skills and will develop entrepreneurial competencies
- **Youth workers** - actively involved in designing teaching materials and creating online educational contexts
- **Communities** - increased cooperation between youth organizations and improved quality of youth work
