Digital citizenship skills

Skills for the future

Today's digital world requires a structural approach to provide young people with the competences they need to become healthy and responsible citizens in the online environment.

The Erasmus+ National Agency from Romania trusted us to set up an educational context which leads to elevating the civic competencies of young people while protecting their online safety.

SCOPE: Improve competencies in 10 digital domains, required within youth online activities

BEING ONLINE

- **Access and inclusion** - to overcome different forms of the digital divide and open digital spaces to minorities and different opinions
- **Learning and Creativity** - to apply attitude towards learning through digital environments, and the capacity to develop and express different forms of creativity
- **Media and Information Literacy** - to interpret, critically understanding and expressing one's own creativity through digital media

WELLBEING ONLINE

- **Ethics and Empathy** - promote positive online behaviours and interactions
- **Health and Wellbeing** - raise awareness of the issues and the opportunities that can affect citizens' wellness in a digitally rich world
- **e-Presence and Communications** - competences like online communication and interaction with others through virtual social spaces

RIGHTS ONLINE

- **Active Participation** - to be fully aware of how interact within the digital environments and make responsible decisions
- **Rights and Responsibilities** - awareness and understanding of their rights and responsibilities in the online world
- **Privacy and Security** - personal protection, data protection, digital identity protection, security measures and safe and sustainable use
- **Consumer Awareness** - implications of the commercial reality of much online space

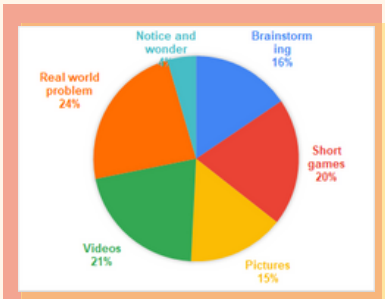
Youth learning styles

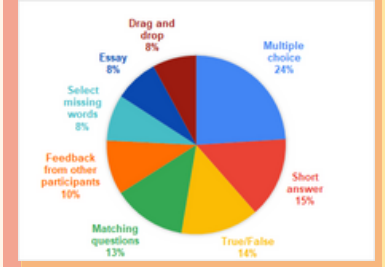
Because we value youth ideas and opinions about quality education, we invite you to be part of our team.

150+ young people joined and helped us to stage the below analyses



Course engagement

Youth equally appreciate exercises, real-world problems, case studies, discussions with peers as well as interactions with instructors and teachers.



Preferred assessment

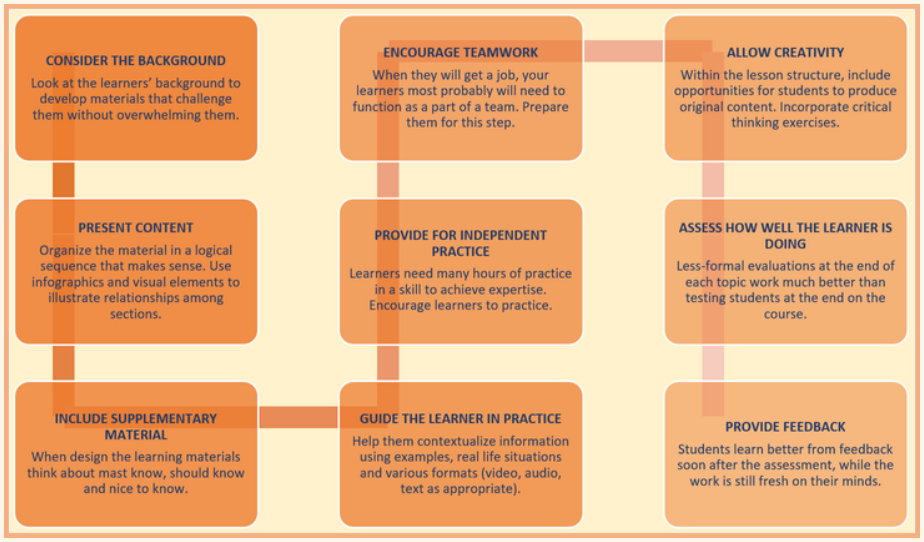
Designing effective online courses

The digital citizenship skills are undoubtedly some of the most valuable skills for a mentally healthy society. However, teaching online courses to develop these skills is really challenging.

Our team collected best practices and developed the DIGCIT manual which focuses on the online teaching methods that foster participants' engagement and lead to skills development.



Those mastering the art of developing stimulating and meaningful learning environments are capable to make the learning journey unforgettable.
