ONLINE TRAINING

MENTORING

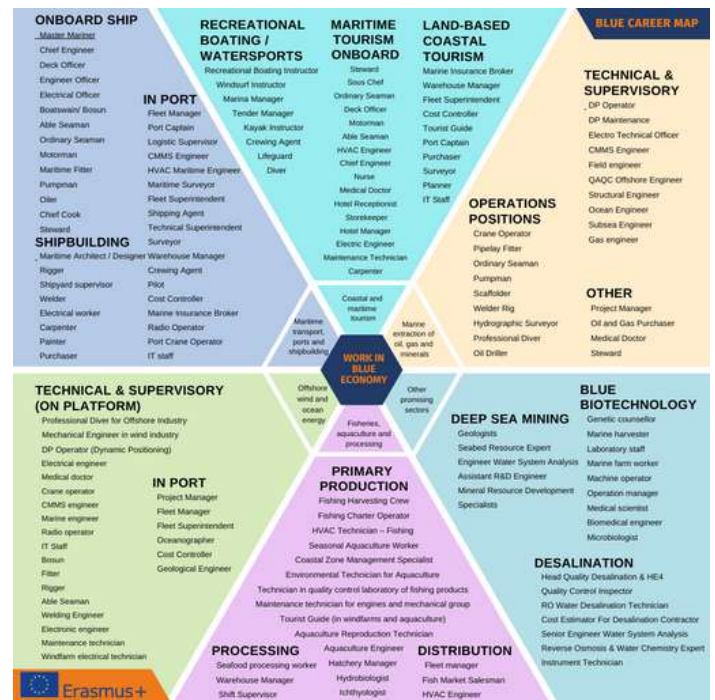

The Career Guidance in Blue Economy Erasmus+ strategic partnership project has come to an end, on this occasion, we proudly invite you to take a look at the results below, which included the work of a team of professionals from Sea Teach, Spain and Osmaniye II Milli Egitim Mudurlugu, Turkey, led by Associations TEAM4Excellence, Romania.

PROJECT RESULTS

30 blue professionals were interviewed and defined the [Career Blue Job Cards](#) offering relevant information to help VET learners make an informed decision when it comes to their future career.

300+ VET learners visited the [Blue Career Map](#) and accessed job cards available for each sector of the Blue Economy, finding useful information about the multitude of offers on the labour market.

88 VET learners expressed expectations from mentoring in blue industry. They find useful information about the career paths to get those job and about the cross-sectoral options.

3 blue professionals presented their career progress and guide VET learners toward successful careers.

E-MENTORING PLATFORM

Scan the code to join the online course or go to <https://courses.trainingclub.eu/>

37 VET teachers, trainers and mentors qualified to guide young mentees. They successfully completed the Blue Economy Online Training Course, which is available on our platform in [English](#), [Romanian](#), [Spanish](#) and [Turkish](#) and includes distinct modules for all blue industry sectors.

37 mentor profiles, being role models for the new generation. These are available on [the E-mentoring Platform](#) along with tools to support mentoring process, fostering cooperation between VET learners, prospective employees in Blue Economy and blue professionals.

60 VET learners planned their 10-year careers and identified their SMART career goals.

116 job cards integrated in the [Blue career path platform](#) presents all blue career jobs, their description, and average salary and creates links among related jobs. It allows the selection of skills from a range of predefined skills and competencies and gives VET learners or prospective employees the directions to move vertically on the same career path, but also shows connections to a desired position in another sector.

A comprehensive manual: [Blue Economy. A Manual for VET Teachers, Trainers, Career Counsellors, Learners and Professionals](#) designed for two categories of personnel: learners / prospective employees gain an understanding of the blue economy job sectors, while career counsellors enhance their professional toolbox with instruments for career guidance.

SHARING RESULTS

On the 30th of September, [TEAM4Excellence](#) promoted the results of the Erasmus+ Strategic Partnership: Career Guidance in Blue Economy at the [Maritime University of Constanta](#).

The event was attended by VET teachers, trainers, mentors, blue professionals and VET students from over 10 educational institutions in the county interested in training in the maritime field, celebrating the World Maritime Day. They learned about the employment opportunities that the maritime career offers directly from the blue professional.
