THINKCirEco Project Update

Empowering Adult Educators for a Circular Economy Future

We are excited to bring you the latest updates from the THINKCirEco project, where we are dedicated to empowering adult educators with the tools and knowledge to engage NEETs and low-skilled adults in the Circular Economy. Our mission is to support them in harnessing the opportunities that the Circular Economy can offer to develop their own entrepreneurial initiatives.

1. Progress on the development of Training Material EntreComp for the Circular Economy

In our first result, we are working hard to develop the EntreComp for the Circular Economy training material. This material will empower and equip educators working with NEETs and low-skilled adults with hands-on methods to cultivate an entrepreneurial mindset and competences rooted in the Circular Economy. More specifically, at this stage:

- **The International Report**, presenting the results from the interviews and focus groups implemented in each partner country, is now ready. This report provides valuable insights into the needs and challenges faced by educators and learners in the context of the Circular Economy.
- Partners are collaborating closely to adapt the EntreComp Framework to the Circular Economy outlining a set of essential skills, attitudes, and knowledge necessary for success in entrepreneurial Circular Economy initiatives.
- Our team is actively working on the syllabus for the training course which will serve as a guide for educators, ensuring that the training is comprehensive and effective in promoting Circular Economy entrepreneurship.

2. Development of the Online platform “The Interactive Learning Community”

Our second result, the online platform known as "The Interactive Learning Community" which is under the process of development. This platform is designed to bring together adult educators, trainers, NEETs, and low-skilled adults in an interactive learning environment focused on the Circular Economy.

THINKCirEco partners are committed to providing valuable resources and fostering a community that drives positive change through entrepreneurship in the Circular Economy.
