

## "Digital Facilitators For Adults 55+"

### Transnational meeting no.4

On October 11, 2023, Asociația Voluntariat Pentru Viata organized the fourth Transnational Meeting in Mărășești, Romania, as part of the Erasmus+ collaboration project, "Digital Facilitators for Adults 55+."

Delegates from partner countries attended the meeting:

- [TEAM4Excellence](#) from Romania (T4E)
- [Formative Footprint](#) from Spain (FF)
- [Volunteering For Life](#) in Romania (VPV)
- [Saricam Halk Egitimi Merkezi](#) in Turkey (SHEM)

The purpose of this activity was to conduct an interim evaluation of the partnership and its outcomes. At the beginning of the meeting, TEAM4Excellence, the project coordinator, provided an overview of the project and the completed project activities to date.

The project coordinator presented the third and final result of the project methodology, which is a guide for educators in two parts: educational materials and video tutorials aimed at improving the digital skills of adults over 55. The guide anticipates the creation of content by all project partners, starting from the five domains of DigComp:

- Information and data literacy
- Communication and collaboration
- Digital content creation
- Safety
- Problem-solving.

PR3 has been finalized in its initial version, and the project's target groups will test and validate the result, providing feedback for final improvements to the PR. Eventually, the guide for digital

facilitators will be available on a Moodle platform, where educators will find content in English, Romanian, Spanish, and Turkish.

During the meeting in Mărășești, the partners also discussed and planned the organization of the project's Multiplier Event, which will take place in Mărășești on October 12, 2023.

This event will provide partner organizations with a space and an opportunity to share and test with adult educators and adults over 55 who wish to implement improvements in their digital routine, whether related to the educational environment or daily life.
