PODSQUAD

About the Project:

The PODSQUAD Project aims to provide young adult NEETs (not in employment, education, or training) with further development opportunities. This project aims to support NEETs by developing suitable and engaging education and training interventions through the medium of podcasting, so that they are confident to be re-integrated into the labour market. Through podcasting, NEETs will be able to develop an individualised career pathway that makes the most of the knowledge and skills they already possess.

Our Progress:

All of the PODSQUAD learning resources have now been finalised in English, Greek, Spanish and Romanian and can be found on the PODSQUAD Online Space: https://podsquadmooc. eu/ Here you can find and explore:

- The In-Service Training Programme for Youth Professionals
- A Mental Health Toolkit of Resources
- An Embedded Learning through Podcasts Curriculum

Explore the PODSQUAD platform here: https://podsquadmooc.eu/

Upcoming Events:

In the final month of the PODSQUAD project, project partners are currently organising their national Multiplier Events in Cyprus, Greece, Ireland, Spain, and Romania. These events will take place as a series of seminars to present the PODSQUAD project results to key local and regional stakeholders in each participating country. Over 100 people will participate in these events which will aim to create local synergies among different sectors of local educational landscapes.

Final Meeting:

The final PODSQUAD Transnational Partner Meeting took place in Nicosia, Cyprus in February 2024. During this meeting, partners discussed the finalisation of all project resources and their sustainability opportunities. Over the next month, partners will encourage their local stakeholders to participate in the Community of Practice to foster cross-cultural networking between young adults and youth professionals.
